

User manual for the data labeling screen of the FahLog application

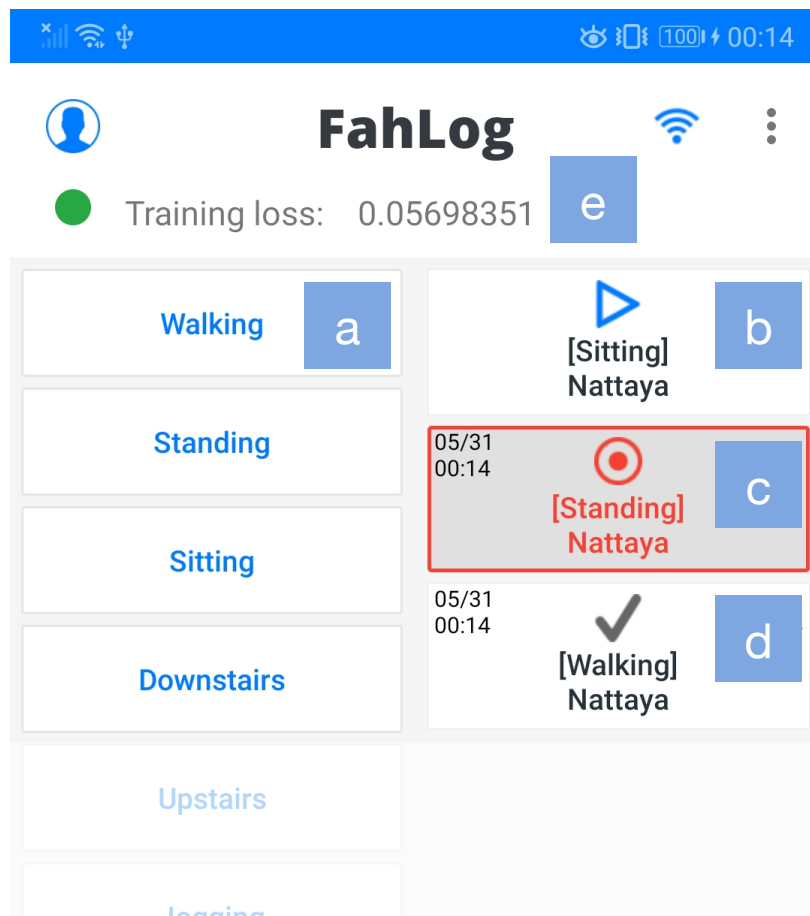

Figure 1. Data labeling screen.

- Figure 1–a presents the list of predefined activities, which can be used for the activity recognition classes.
- After selecting the activity label from the left column, the activity label is created as a box in the right column.
- Each time the labeler taps an activity label box, it transitions to before start ▶ (Figure 1–b) → doing activity ◉ (Figure 1–c) → finish ✓ (Figure 1–d)
- One can record the beginning and end of the action. The left and right columns provide the scroll view function to see more content.
